GIANT HERO WHO TRIED

Braced His Body Under Descending Lift to Save Comrades and Was Crushed.

Daniel J. Lynch, twenty-two years old, of No. 304 West 120th Street, died to-day at St. Vincent's Hospital from njuries received in attempting to save two fellow-workmen from death.

Lynch, who was a giant in build, was working yesterday with two elevator operators making repairs in an elevator pit at the loft building, Nos. 48 and 50 West Fourth Street, where Lynch was an engineer. The elevator, which had been at the first floor when the men entered the pit, began slowly to settle down on them. The men did not notice their danger until the car was almost

upon their heads. Lynch, a six-footer, weighing more than 200 pounds, shouted for help. Ther braced himself in an attampt to stop the elevator, making a bridge of his own body to protect his frailer helpers herole "ant had been fatally injured. Henry Tottlewell, of No. 568 Lenex Avenue, suffered a broken collarbone and Joseph Torrelli, of No. 218 Thompson Street, received injuries to his

TO STOP ELEVATOR DIES FOUR CANDIDATES FOR MAYOR SUM UP THEIR CAMPAIGN FOR EVENING WORLD

(Continued from First Page.)

000,000 were granted to millionaire individual and corporate backers of Mayor Mitchel.

I have shown that a former client of Mayor Mitchel, the Queensboro Corporation, has had its assessments reduced \$1,033,000, or 33 1-3 per cent, on property which had greatly increased in value as the result of a subway extension secured by Mr. Mitchel while President of the Board of Aldermen, for the benefit of that property at city expense,

I have shown that Mr. Mitchel surrendered our public schools to Rockefeller domination, which was responsible for the iniquitous Gary system

I have shown that the city budget has increased \$47,000,000 under the Mitchel-Prendergast administration.

I have shown that the whole Mitchel campaign is a bold attempt of the money kings of Wall Street to retain control of our city government, and that on the Mitchel committee there is a combination of special privilege agents representing interests that aggregate \$9,000,000,000. Mayor Mitchel has not disproved any of these charges. He has

preferred to seek refuge behind the flag and to challenge the patriotism of all who oppose him. He has done this despite the fact that the day after my desig-

nation I declared that I was in full accord with the war policy of my country and stood ready to give my most loyal support to But we have won the battle. There is not the slightest doubt

about the election of the entire Democratic ticket. JOHN F. HYLAN.

Morris Hillquit:

"Our Campaign Has Evoked a Great Popular Uprising for ination of the candidates on the ticket the prevailing odds. Democracy-We Have No Doubt of the Verdict." To the Editor of The Evening World:

Our campaign has been made on four main issues: A humane, efficient city government; our programme for reducing the great burden of soaring prices under war conditions under plans similar to those found successful in scores of European cities; the preservation of our constitutional guarantees of a free press, free speech and freedom of assemblage; the issue of having the United States take the lead in moving for a speedy, just and general peace, a negotiated peace without forcible annexations or punitive indemnities, based on disarmament, and a pact of all nations to prevent any recurrence of a catastrophe like this war.

We believe such a peace would be the greatest possible blow to Kalserism, junkerism, militarism and imperialism in all countries. While the candidates of other parties have indulged in a campaign of mud-slinging and abuse, we have stuck calmly to the issues and have evoked a great popular response which will sweep us into office next week by a remarkable vote.

We have been gaining steadily with increasing momentum day by day. Democrats and Republicans of all classes, by the scores of thousands, have been flocking to our standard. Already Mesars, Mitchel and Bennett are hopelessly beaten. The issue up to the people of New York is whether they want four years of an old-fashioned Tammany administration, with all that that implies, or a human administration pledged to officer the city with the best expert assistance obtainable, irrespective of party lines, and to conduct the city solely in the interest of the people.

Our campaign has called forth a great popular uprising for democracy, for human happiness, for a just and speedy peace. We MORRIS HILLQUIT. have no doubt of the verdict.

GERMANY MAKING SUPREME EFFORT TO BEAT U. S. IN AIR

Twenty-Nine Huge Factories Taken Over to Build Great Fleet of Planes.

WITH THE FRENCH ARMIES IN THE FIELD, Nov. 3 (United Press). Germany is making supreme efforts to meet America's aviation programme. Whatever the number of aeroplanes and pilots America may be able to contribute by next spring, Germany will duplicate the performs ance, if it is at all possible.

Documents taken on prisoners and assembled to-day showed some extraordinary efforts by Germany to increase the number of her planes and counterbalance the aviation superiority which America's contribution oth-

erwise would bring. Since last spring no less than twenty-nine huge German factories formerly engaged in production of general war material have been converted into factories for airplanes and hydroplanes. In addition, oldestablished airplane factories at Berlin. Cologne, Altanna, Johannisthal, Potsdam, Charlottenberg, Dresden, Spandau and other industrial centres

have been greatly increased in size. The Fokker factory has just taken over the largest plane factory in Northern Germany-the Bersina, at Schwerin.

But not only is Germany increase ing her own production, she is making purchases of foreign countries. An order for 250 Argus motors has been placed with the Raderneskseebac at Zurich.

Simultaneously with this speed-up programme in manufacture, Germany is experimenting to improve her output. Among the newer types now being put out is a 200-horsepower being put out is a 200 horse-power Fokker. A new bombing plane has also been developed-a two-engined machine, with a carrying capacity of 1,700 pounds of bombs. The motors are Mercedes type, 260 horse-power, and when fully loaded the planes are capable of climbing 12,000 feet in

thirty-five minutes. Germany now figures an airplane is worn out" after 150 hours of flight. At present her greatest weakness in manufacture is the propeller, as the Germans do not seem to have a sumcient supply of the proper wood.

To provide the necessary pilots for the new German aviation programme, the military authorities are offering exceptional facilities for all volun-

Some idea of the degree of perfecion which the Germans are endeavoring to put into their new programme may be gathered from the fact that a new German plane recently forced to land on French soil paratus for drying the clothing and gloves of the aviator and at the same time furnishing current for wireless communication.
